## Professional Summary

Full-stack Software Engineer with experience building web and mobile applications, RESTful APIs, and scalable backend systems. Pursuing a BSc in Computer Science and Informatics at the University of Johannesburg. Proficient in Python, Java, JavaScript, React.js, FastAPI, and Flask, with a track record of delivering practical, user-focused solutions in agile environments.

## Technical Skills

**Languages:** Python, Java, JavaScript, HTML, CSS, SQL, C++, C#, Visual Basic

**Frameworks & Libraries:** React.js, FastAPI, Flask, Node.js

**Databases:** PostgreSQL, MySQL

**Tools & Platforms:** Apache Kafka, Git, GitHub, Figma, Visual Studio, Google Analytics

**Concepts:** RESTful APIs, Full-Stack Development, Mobile App Development, Data Pipelines, OOP, Agile

## Education

### University of Johannesburg

Bachelor of Science in Computer Science and Informatics

Feb. 2022 – Nov. 2026 (Expected)

Johannesburg, Gauteng

- **Relevant Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning
- Certificate in 4IR (Fourth Industrial Revolution); Certificate in African Insight

### Gritlab Africa

Certificate of Completion – Introduction to Python (3-Month Course)

2023

Online

- Completed a structured 3-month course covering Python fundamentals, algorithms, and problem-solving; awarded a certificate of completion.

## Experience

### Johannesburg Business School (JBS)

Software Developer Intern

Aug. 2023 – Nov. 2025

Johannesburg, Gauteng

- Contributed to the full software development lifecycle, delivering backend services and APIs using Python and Java within an agile cross-functional team.
- Implemented system integrations and infrastructure improvements that enhanced end-user experience and reduced onboarding time for new team members.

## Projects

### FarmForward – Farm Management Platform | HTML, CSS, JavaScript, Node.js, Express.js, PostgreSQL

2026

- Built a full-stack farm management web application with separate manager and worker dashboards, featuring task and job management, employee tracking, resource and tool inventory, complaints handling, and a real-time analytics dashboard.
- Designed a RESTful Express.js API with 8 route modules (auth, employees, tasks, resources, tools, complaints, analytics, reports), JWT authentication, and a normalised PostgreSQL schema across 10 tables.

### Eco-Hub – University Second-Hand Marketplace | ASP.NET WebForms, C#, WCF, SQL Server

2025

- Developed an n-tier e-commerce platform for university students to buy and sell second-hand goods, using ASP.NET WebForms for the frontend and a WCF SOAP service for the business logic layer.
- Implemented full shopping functionality including product listings with category filtering, shopping cart, checkout, invoice generation, order history, and a manager portal for product and account management.

### MatricPath – University Application & Bursary Portal | React.js, Flask, PostgreSQL

2025

- Built a web platform guiding South African matric learners through university applications, with directories of institutions, programmes, admission requirements, and bursary listings.
- Designed a multi-step application guide and institution comparison tool to reduce friction for first-generation university applicants.
